Professional Summary

Full Stack PHP/Laravel Developer with hands-on experience building internal tools, CRUD systems, responsive interfaces, and database-driven applications. Strong background in PHP, Laravel, Blade, CodeIgniter, JavaScript, jQuery, Bootstrap, MySQL, MariaDB, Docker, and Git-based workflows.

I also bring production support experience from IT operations, troubleshooting, preventive maintenance, and daily system reliability routines. This combination helps me ship practical solutions, debug issues quickly, and work well with real business processes.
